## Ophthalmology Futures European Forum 2017

Dear Colleagues,

Welcome to Ophthalmology Futures European Forum 2017.

Following our second successful Asian Forum in Singapore earlier this year, we are delighted to host our sixth European Forum in Lisbon. Each Forum aims to present a new perspective on innovation with small company presentations, research and development updates, market opportunities and pearls for success in the ophthalmology sector.

The topics of OF 2017 Lisbon will include macular degeneration, dry eye, presbyopia, refractive surgery and glaucoma surgery.

Our panel discussions on clinical topics will continue with the previous format of clinician-driven questioning to various stakeholders in the innovation cycle.

Our business panels will focus both on early stage innovation as well as advice to small company executives hoping to attract attention from larger corporations.

We will endeavour to make the meeting as interactive as possible.

As always, we would like to thank our advisory board, programme committee, corporate presenters, sponsors and eminent faculty for their invaluable support and assistance without which this meeting would not be possible.

Thank you for joining us in Lisbon!
